

FITNESS INOX

1
Solid construction made of black steel S235JR, cleaned in the sandblasting process. Protected against corrosion by galvanizing and powder coating with polyester paint QUALICOAT attested.

2
Solid construction made of stainless steel AISI 304 totally resistant to weather conditions.

3
Back support and seats made of colourful triple layered polyethylene. HDPE 15 mm thick in the highest quality, totally damp-proof and resistant to UV.

4
Bumpers made of durable polyurethane.

5
Plate made of anodized aluminium placed on a handle made of polyamide. The instruction contains following information:

- Which muscles are being trained
- Norm number
- Emergency numbers.

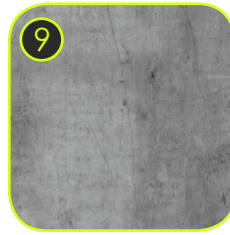

6
Self-aligning roller bearings. Bearings in casings securing them from water access. The joints are maintenance-free and don't require periodic lubrication.

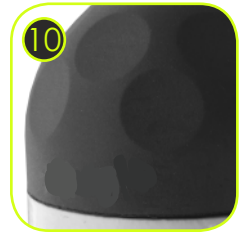

7
Air brake. Mechanism increasing the resistance with the increase of rotation speed. Side panels and pedals made of stainless steel.

8
Connecting elements like screws, nuts, washers made of stainless steel. Vandal-proof screw plugs made of injection molded polyamide.

9
Anti-slip plate made of 13 mm HPL, in the highest quality, totally damp-proof and resistant to UV.

10
Post endings finished with soft EPDM rubber.

11
Anti-slip anthracite 10 mm HPL platform plate with a very high resistance to weather conditions and attrition.

12
Plates made of colourful triple layered polyethylene. HDPE 15 mm thick in the highest quality, totally damp-proof and resistant to UV.
